HOTEL GROUP

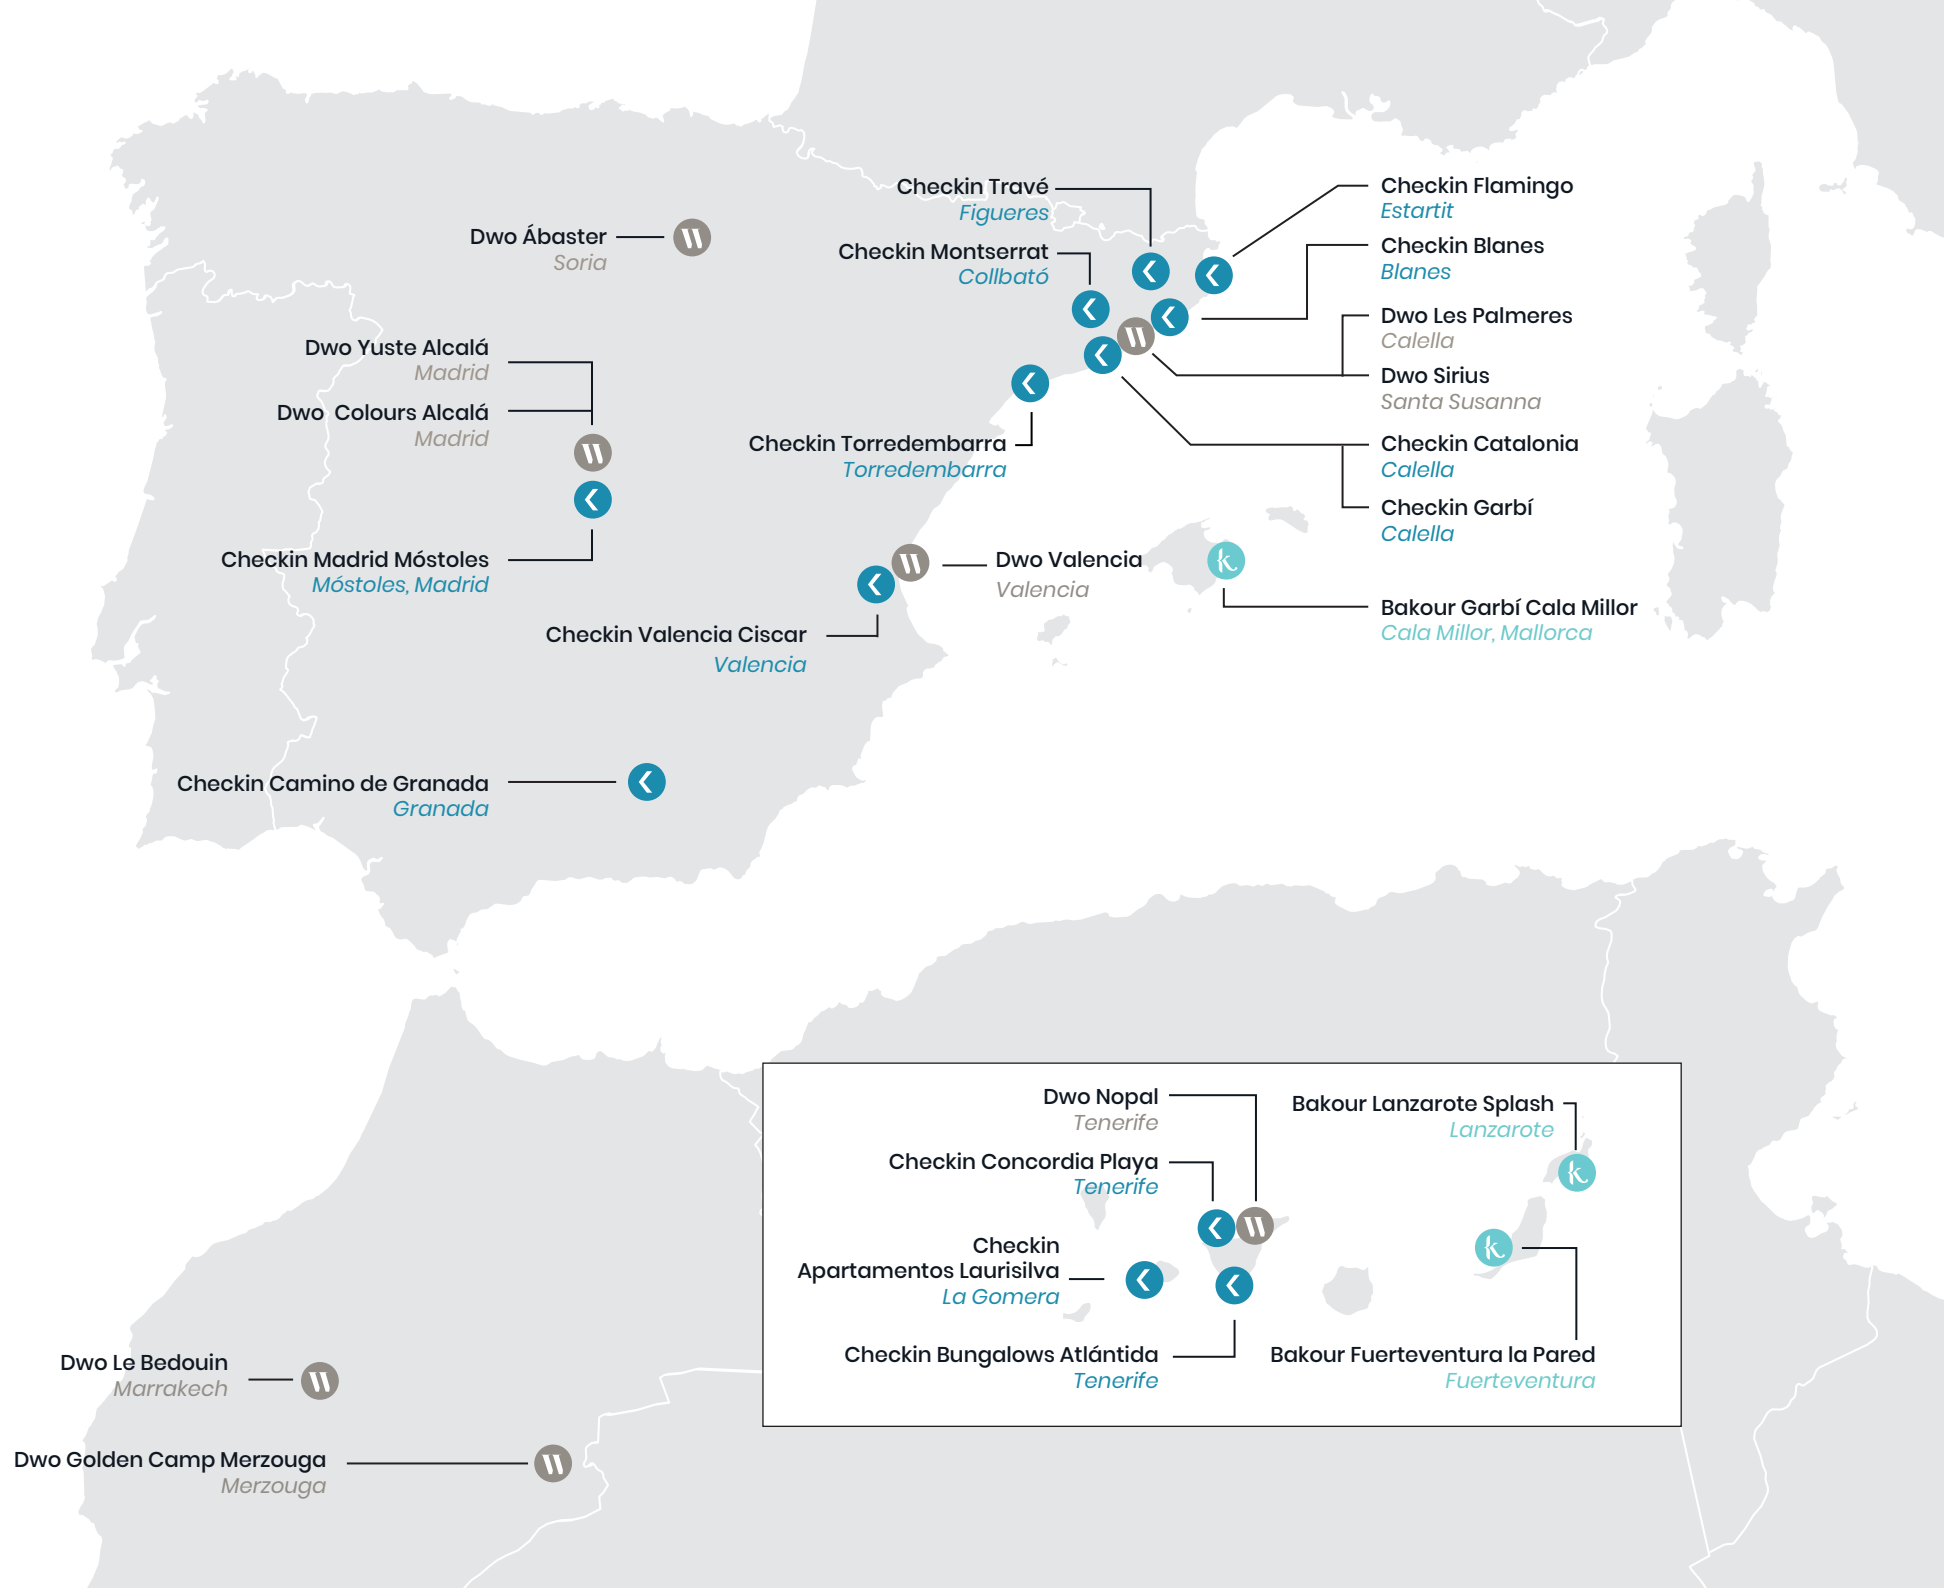

About us

Checkin Hotels was founded in 2013 by a group of professionals with extensive experience in the sector, with the idea of finding a small gap in the independent hotel market to apply our business model in the most practical and efficient way possible.

Our commitment is to satisfy the client, offering privileged locations and personalized services; in brief, experiences to remember. To this end, we have segmented our establishments into three typologies, differentiating the brands to provide the customer with a clearer choice.

Our constant effort to improve is based on sustainable development, reforming the facilities and a firm commitment to use the latest generation technological tools.
